NeuroAIQ
The Neuroscience of AI Adoption

neuroaiq.com.au

USER DOCUMENTATION

How to use, review and look after the new site.

A plain-English guide to the rebuilt NeuroAIQ website, as built and tested. It shows what each page is for, walks through every task a visitor can do, and explains the jobs the NeuroAIQ team will do once the site is live. No technical knowledge needed.

PREPARED FOR
NeuroAIQ Pty Ltd

PREPARED BY
Team B58, CSE3CAP
La Trobe University

DATE
13 October 2026

VERSION
1.1, handover

THE SHORT VERSION

Every page leads to one place: a conversation with NeuroAIQ.

0 Who this guide is for

DR MAHTAB AMERI AND THE NEUROAIQ TEAM

Sections 1, 2, 4 and 5

Reviewing the build now, then handling enquiries, bookings and updates once it's live.

ANYONE CHECKING THE VISITOR EXPERIENCE

Sections 2 and 3

What a buyer sees on each page, and each task step by step.

WHEN SOMETHING ISN'T WORKING

Sections 6 to 8

Troubleshooting, common questions and the limits of the current version.

BEFORE YOU START

The new site **is built but not live yet**. It runs as a **review build**: every page, the menu, the filters, the event tabs, the booking steps and the enquiry form all work, on computers and phones. Two things only happen at launch: enquiries are delivered to NeuroAIQ, and bookings go into a real calendar. Until then the site confirms on screen and sends nothing. This guide says which is which at each step.

1 Quick start

Two minutes to open the site and find your way around.

YOU'LL NEED

Any computer, tablet or phone

A current version of Chrome, Edge, Safari or Firefox. The layout adapts to the screen, so a phone works as well as a laptop.

OPEN IT

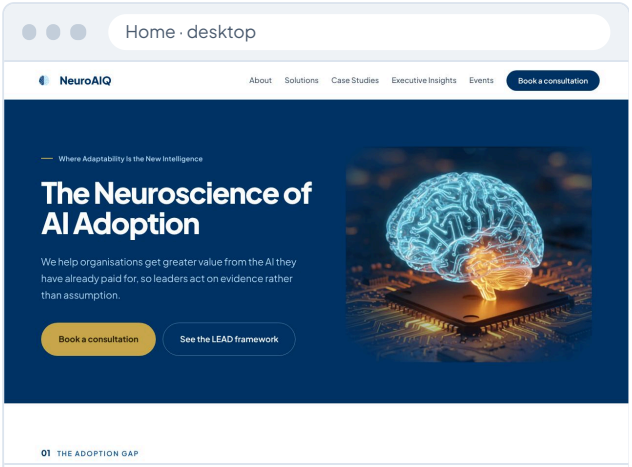

Either way

1. **The review link: grand-dodol-927468.netlify.app**. Open it like any website. It's hidden from search engines, so share it only with people reviewing the site.
2. **Or from the files:** open the **src** folder from the project repository and double-click **index.html**.

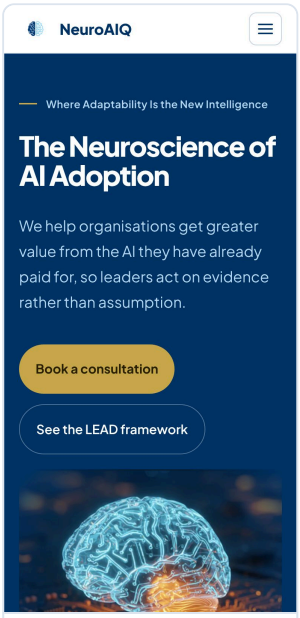

GET AROUND

Moving between pages

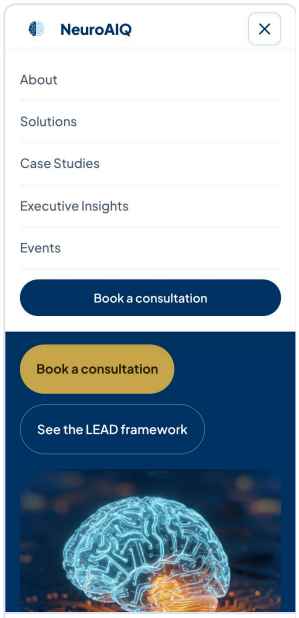

- **On a computer:** click About, Solutions, Case Studies, Executive Insights or Events in the menu at the top.
- **On a phone:** tap the **menu button** (three lines, top right) to open the same list. Tap it again, or press Escape, to close it.
- **Book a consultation** is at the top of every page and leads straight to booking.
- The footer links to everything else, including Partnerships and Privacy.

Home on a computer. The menu is the same on every page; the current page is underlined in gold.

On a phone.

Menu open.

GIVING FEEDBACK

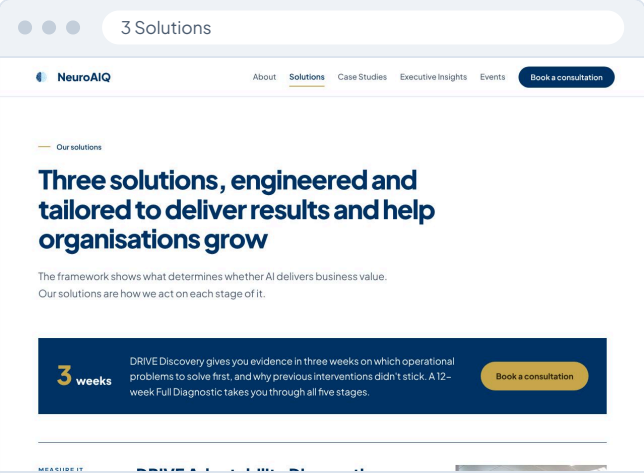

How to point at something

Most sections inside a page are numbered, like **"04 · DRIVE Discovery"**. Quoting the page name and section number makes feedback quick to act on, for example *"Home, section 05: change the second sentence to… "*. Feedback goes to the team liaison (section 9) until a new web partner takes over.

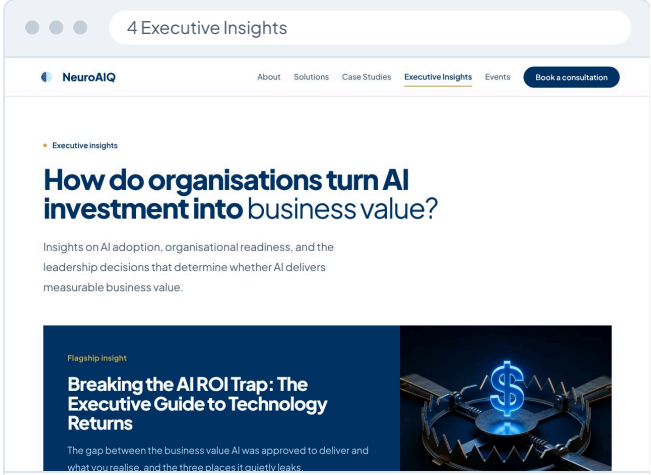

2 The pages, and what each one is for

Nine pages, plus Privacy. Each has one job in moving a buyer from "I have a problem" to "let's talk".

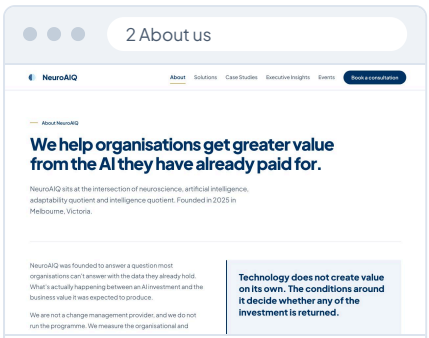

#	PAGE	WHAT IT'S FOR	MAIN NEXT STEP
1	Home	Explains, in order, why AI investment isn't paying back, why NeuroAIQ is relevant, how LEAD™ and DRIVE™ work, the five outcomes, and a case in point.	Book a consultation
2	About us	Who NeuroAIQ is and isn't, the founder, the team and the AI Workforce Readiness Program.	Book a consultation
3	Solutions	DRIVE™ (measure it), Advisory (embed it) and Workforce Readiness (scale it), with a detail section for each.	See DRIVE™ in detail
4	Executive Insights	Short articles, each answering one question a leader asks. Filter by business priority or leadership role.	Read the article
5	Article	"Should we keep investing in AI?", the first published article, and the layout every article will use.	See DRIVE™
6	Case Studies	Problem, approach, outcome, evidence. Holds the existing case study, with room for more.	Book a consultation
7	Events	Past, current and upcoming events, and where NeuroAIQ has spoken.	Register
8	Contact & booking	Book a 30-minute Discovery Consultation, or send an enquiry.	Book, or send
9	Partnerships	Sunway University, the Readiness Program, and speakers from Deakin and CSIRO's Data61.	Book a Discovery Consultation

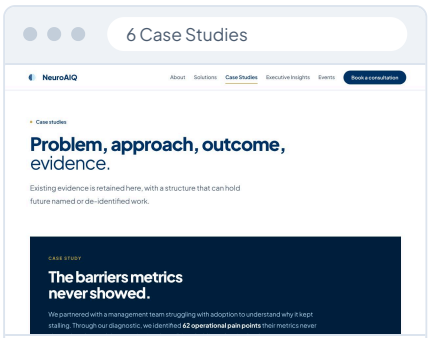

Solutions. The three solutions shown as steps, with DRIVE™ first.

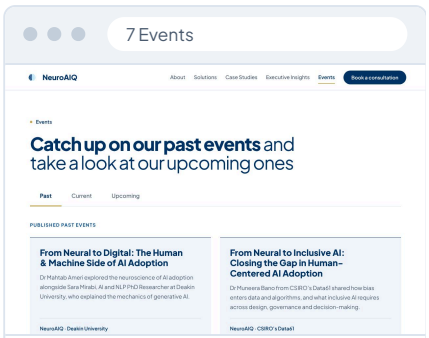

Executive Insights. A flagship guide, then articles you can filter by priority or role.

About us. What NeuroAIQ is and isn't, then the team.

Case Studies. Problem, approach, outcome, evidence.

Events. Past, current and upcoming.

3 What a visitor can do, step by step

These are the tasks the site is built around. Each one works in the review build; where launch changes what happens, it says so.

TASK 1

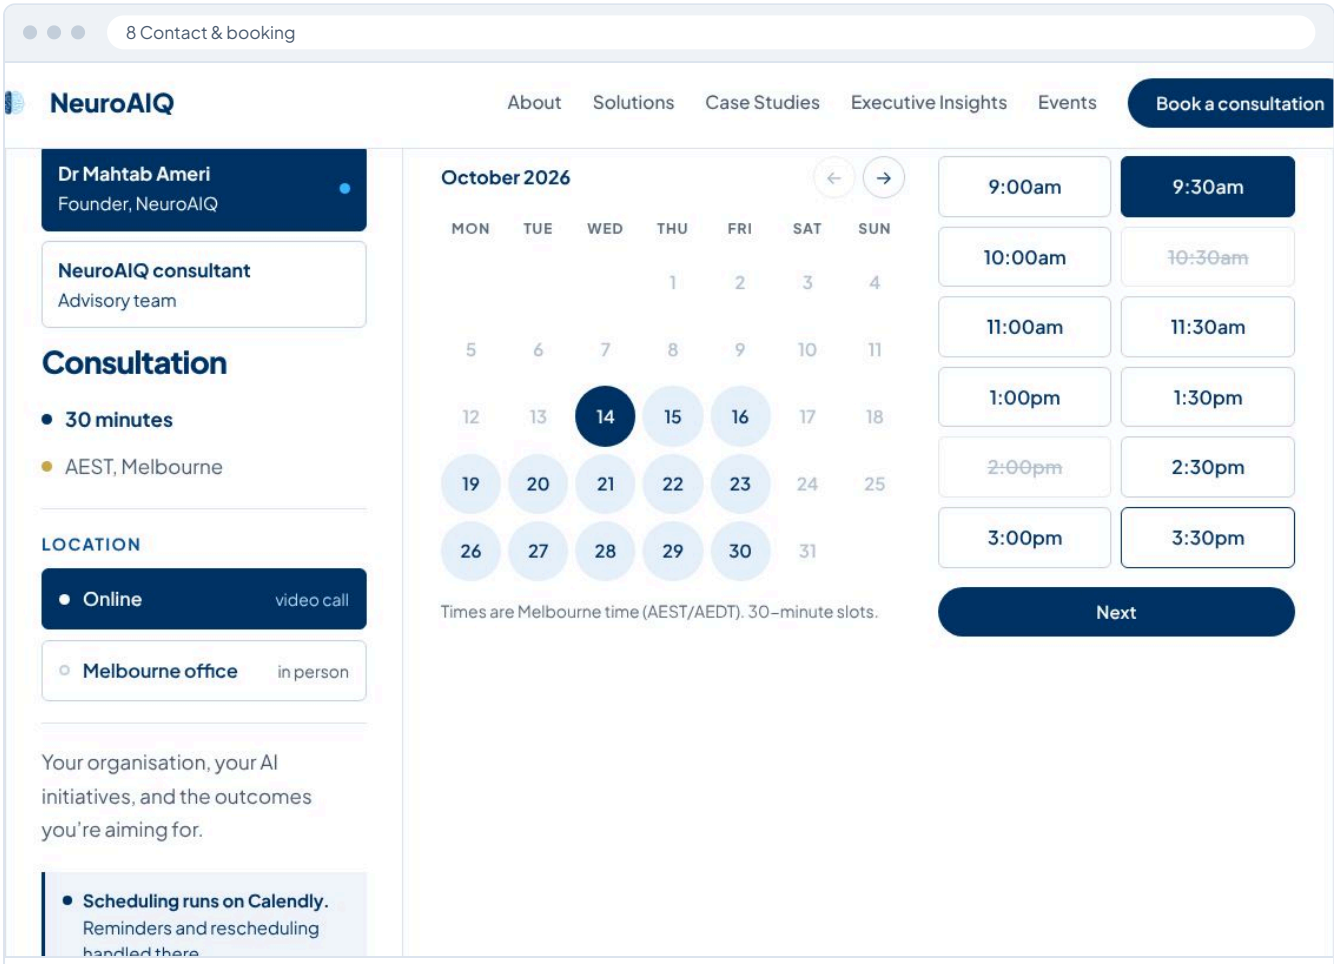

Book a Discovery Consultation

1. Click **Book a consultation** at the top of any page.
2. On the contact page, choose who to meet: **Dr Mahtab Ameri** or a **NeuroAIQ consultant**.
3. Pick a highlighted date in the calendar. Greyed-out dates aren't available.
4. Pick a 30-minute time on the right. Crossed-out times are taken.
5. Click **Next**, enter your name and work email, and click **Confirm booking**. Missing details are pointed out.

REVIEW BUILD, AND AT LAUNCH

Review build: every step works and you get an on-screen confirmation, but availability is a sample and nothing is booked.

At launch: it shows NeuroAIQ's real availability and sends a confirmation email. NeuroAIQ may instead choose to keep booking behind a private link sent after an enquiry.

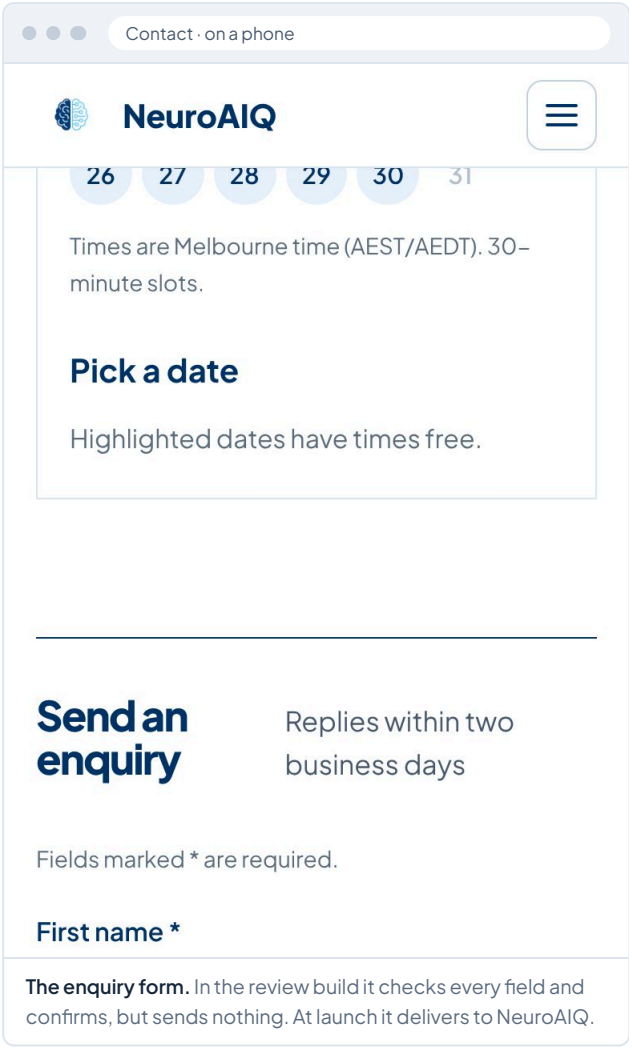

Booking. Choose a person (left), a date (middle), then a time (right). Weekends and past dates can't be picked. Times are Melbourne time.

TASK 2

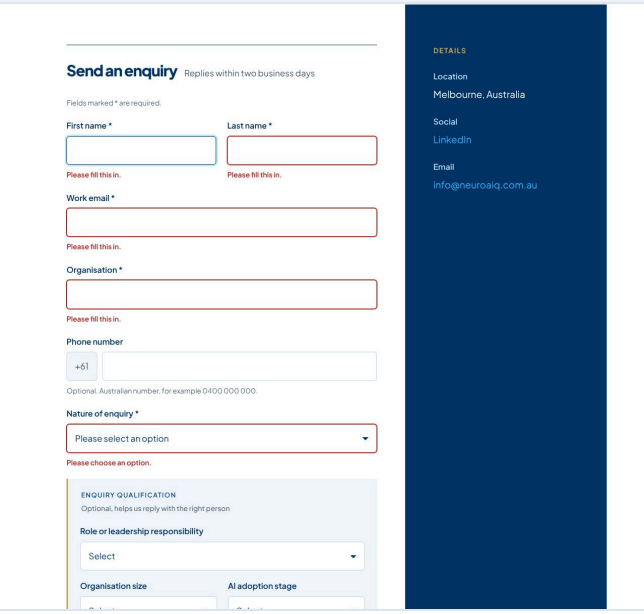

Send an enquiry

1. On the contact page, scroll down past the calendar to **Send an enquiry**.
2. Fill in the fields marked ***** (see the table below).
3. Optionally, fill in the **Enquiry qualification** box. It helps NeuroAIQ reply with the right person and the right information.
4. Describe the challenge you'd like to discuss, then click **Send enquiry**.
5. If anything is missing, the form says which fields and moves you to the first one. Otherwise a confirmation appears, and NeuroAIQ replies within **two business days**.

FIELD	NEEDED?	TIP
First and last name	Yes	
Work email	Yes	A work address, so the reply goes to the right place
Organisation	Yes	
Phone number	Optional	Australian number; +61 is filled in
Nature of enquiry	Yes	Pick the closest
Role, size, AI-adoption stage	Optional	Helps NeuroAIQ prioritise
Your challenge	Yes	Two or three sentences is plenty

The enquiry form. In the review build it checks every field and confirms, but sends nothing. At launch it delivers to NeuroAIQ.

Missing details. Each field says what it needs; a summary sits above the button.

Sent. The confirmation replaces the form.

TASK 3

Work out where to start

1. Open **Solutions**. Read the three steps: measure it (DRIVE™), embed it (Advisory), scale it (Workforce Readiness).
2. Click **See DRIVE™ in detail** to read how the diagnostic works and what you get: evidence on what to fix first, in three weeks for DRIVE Discovery, or the full five stages over twelve weeks.
3. Not sure? The Solutions page ends with **"Not sure which is the right starting point?"**, which leads to a conversation.

TASK 4

Find an article for your role

1. Open **Executive Insights**. The flagship guide, *Breaking the AI ROI Trap*, is at the top.
2. Under **Explore by business priority or leadership responsibility**, choose a priority (for example Governance and risk) or your role (for example Leading AI adoption and operations).
3. The list narrows straight away. If nothing matches both choices, a message says so; click **All** to reset.
4. Click **Read the article**. So far one article is published (*Should we keep investing in AI?*); the others say "Article coming soon".

TASK 5

The self-check (coming soon)

For buyers who aren't ready to talk, Home section 07 introduces a short **AI Adoption Readiness Self-Check**: a few questions that give an indicative reading and suggest whether a deeper conversation would help. It's marked **Coming soon** because NeuroAIQ hasn't yet decided whether to offer a free tool, or what to call it.

TASK 6

Check events and partnerships

- **Events:** switch between **Past, Current** and **Upcoming**. Past events include sessions with Deakin University and CSIRO's Data61, and the NeuroLead Workshop. Current and Upcoming say when nothing is scheduled and point to LinkedIn, where new events are announced first. On a keyboard, the left and right arrow keys move between tabs.
- **Partnerships:** read about the Sunway University partnership and the AI Workforce Readiness Program, then **Book a Discovery Consultation** to discuss working together. The page is also linked from every footer.

4 For the NeuroAIQ team: running the site

What the team does once the site is live. Some answers depend on two decisions still open: where the site is hosted, and who looks after it. Where that changes the steps, both versions are given.

EVERY WORKING DAY

Handle enquiries

1. Enquiries arrive in **HubSpot**, the **Microsoft 365** inbox, or both. NeuroAIQ chooses which before launch.
2. Read the qualification answers first: role, organisation size and AI-adoption stage tell you how urgent and how big the opportunity is.
3. Reply within **two business days**. The website promises this, so a slow reply costs trust.
4. In HubSpot, leave the source as recorded. It's how the monthly report shows which pages and channels bring in enquiries.

AS THEY COME IN

Manage bookings

Bookings appear in the calendar of whoever was chosen, with the visitor's name and email. Keep availability up to date in the booking tool. Times you block out disappear from the website straight away. If you'd rather qualify buyers first, ask the web partner to switch the page to enquiry-only and send booking links privately.

WHEN THINGS CHANGE

Updating the site

I WANT TO…	IF THE SITE STAYS ON WORDPRESS	IF THE SITE MOVES TO STATIC HOSTING
Change some words	Log in, go to **Pages**, open the page, edit, click **Update**. Check it on your phone.	Send the page number, section number and new wording to your web partner.
Publish an article	**Posts → Add New**. Add a title that asks the question, a short description, a share image and a category. Then **Publish**.	Send the text, title, short description and image. The partner adds it to the Insights list.
Add an event	Edit the **Events** page and add it under Upcoming. After it happens, move it to Past.	Send name, date, venue, one line about it and the registration link.
Add a case study	Get the client's approval first (named or de-identified). Provide problem, approach, outcome and evidence, which is the layout on page 6.	

IMAGES

Getting pictures right

- **Real over generic.** Photos from NeuroAIQ's own events beat stock images. Get permission from anyone pictured.
- **Small files.** Under 300 KB each. A free tool such as Squoosh shrinks them without visible loss.
- **Describe it.** Every image needs a short description ("alt text") of what it shows, for screen readers and search engines.
- **Sharing on LinkedIn.** The share image for a page or article is 1200 × 627 pixels.

ONCE A MONTH

Reading the report

MEASURE	WHAT IT TELLS YOU	GOOD LOOKS LIKE
Qualified enquiries	Whether the site is doing its job	Up, month on month
Searches from new people	People finding NeuroAIQ without already knowing the name	A growing share
Pages in Google	Whether search engines can see the site	Every key page
AI assistant mentions	Whether ChatGPT, Claude, Gemini, Copilot and Perplexity name NeuroAIQ	Rising over six months
Speed on mobile	Whether phone visitors wait	"Good" on every page

ALWAYS

Keeping accounts safe

DO

- Use two-step sign-in (MFA) on every account that can change the site, domain or email
- Keep logins in a password manager
- Give each person their own login, with only the access they need

DON'T

- Share passwords by email, chat or in documents
- Trust an "urgent" email about your domain or hosting. Log in directly instead of clicking the link
- Leave former staff or students with access

5 Testing: what we checked, and how

Every visitor task in section 3 is covered by an automated test that clicks through it the way a person would, on a computer and on a phone. All 64 runs passed on 13 October 2026.

TASK	WHAT THE TEST DOES	RESULT
Reach booking	From Solutions, opens the menu (on a phone), checks the current page is marked, clicks Book a consultation	PASS
1. Book a consultation	Picks the consultant, a date and a time, tries to confirm with no details (rejected), adds them, confirms	PASS
2. Send an enquiry	Sends it empty (six errors, focus on the first), with a bad email and phone (caught), then complete (confirmed)	PASS
4. Find an article	Filters by Governance and risk, then by a role with no match (message shown), resets, opens the article	PASS
6. Events	Switches tabs by mouse and by arrow key	PASS
Every page	Loads, every image shows and is described, nothing spills sideways on a phone, no accessibility problems rated serious	PASS

Google's Lighthouse rated the Home and Contact pages **100 for accessibility** and 97 (phone) to 100 (computer) for speed. The client's own reviews were the earlier test: on 22 September she described the design as "a strong foundation" with "a much stronger narrative".

These tests show the site works as designed. Whether real buyers find it easy is a separate question. The team asked people outside the project to try it.

TESTING WITH PEOPLE

Five people, six tasks, 13 October 2026

People outside the team opened the review link on their own device and tried the six tasks in section 3, then answered a short Google Form: a ten-second first impression, how each task went, and what got in the way. Answers were anonymous and given with consent.

TASKS COMPLETED
26 / 30
18 easily, 8 with some effort

EASE OF USE
4.2 / 5
Ratings 3, 4, 4, 5, 5

KNEW IT WAS ABOUT AI
5 / 5
3 said "consultancy"

DEVICES
2 · 2 · 1
Laptop, phone, tablet

TASK	DONE EASILY	TOOK EFFORT	COULDN'T
1. Book a consultation	3	1	1
2. Send an enquiry	3	2	0
3. Find out what DRIVE™ is and how long it takes	4	1	0
4. Find an article for your job	4	0	1
5. Find who founded NeuroAIQ	3	1	1
6. Find upcoming events	2	2	1

WHAT WE LEARNED

Findings, and what we'd change

FINDING	EVIDENCE	RECOMMENDED CHANGE
An empty "Upcoming" tab reads as broken	Events was the hardest task: only 2 of 5 found it easy. "Found the page but nothings there."	When nothing is scheduled, say when the next event will be announced and offer a sign-up, or hide the tab until there is one
The forms feel long	"Requires lots of information" on both booking and enquiry; 3 of 5 needed effort on one or both	Collapse the optional qualification block behind "Tell us more (optional)"; keep the booking details step to name and email
The pages carry a lot of text	"A lot of information" (overall comment, alongside the lowest ease rating)	A copy pass for length on Home and Solutions, in line with the client's rule that every section must earn its place
"Adoption" doesn't land in ten seconds	All five knew it was about AI, three said consultancy, but only one said "AI adoption"	Put "AI adoption" in the hero sentence, not only the headline
The founder is hard to find on a phone	One phone user couldn't find the founder, an article, booking or events (rating 3 of 5); the founder is only on About	Add a short founder line to the Home page (the website audit flagged the same gap on the live site)

Small, self-selected sample (two business owners, one manager, two students), self-reported rather than observed. One response arrived minutes after the form went live and may have been a team check; without it, completion is 20 of 24 and average ease 4.25. Treat this as an early signal to check with three to five buyers from the target audience before launch, not a final verdict.

6 Troubleshooting

Start here when something doesn't look right.

WHAT YOU SEE	WHY	WHAT TO DO
The booking calendar is empty or the menu doesn't open	JavaScript is switched off	Turn JavaScript on; the booking panel offers the enquiry form instead
The form won't send	A required field is empty or an email or phone number isn't valid	Read the red message under each field; the summary above the button counts them
"Nothing was sent" under the confirmation	This is the review build	Expected until launch
The site doesn't show up on Google	The review build is hidden from search engines on purpose	Expected until launch
***After launch:* no enquiries for a while**	Form or email settings changed; messages in spam	Send yourself a test enquiry; check spam and HubSpot; tell your web partner
***After launch:* browser warns the site isn't secure**	The security certificate didn't renew	Contact your web partner the same day
***After launch:* strange pages or links appear**	Possible compromise	Don't log in from that page. Call your web partner; the security plan's incident steps apply
***After launch:* can't log in**	Password or MFA device changed	Use your password manager's recovery, or ask the account owner to reset

7 Common questions

When will the site go live?	When NeuroAIQ has chosen where it's hosted and who looks after it, and the form and booking are connected. The System Maintenance Document has the launch steps.
Can I edit the site myself?	On WordPress, yes. On static hosting, changes go through a web partner, unless an editing tool is added later.
Where do enquiries go?	HubSpot, Microsoft 365, or both. NeuroAIQ decides before launch.
Why is some wording different from the prototype?	Seven lines were changed to match NeuroAIQ's own positioning (for example the hero now says "We help organisations get greater value from the AI they have already paid for"). Each is listed in the repository's CHANGELOG for NeuroAIQ to approve or reverse.
Where are the client logos?	Removed until NeuroAIQ has permission to show them.
Is the self-check free?	Undecided. It's a placeholder until NeuroAIQ decides.
Are visitors tracked?	At launch, with Google Analytics, which the privacy policy will disclose. No enquiry details are ever passed to advertising platforms.

8 Known limitations of the review build

- [ ] From user testing: an empty Upcoming events tab looks broken, the forms feel long, and the founder is hard to find on a phone (section 5).
- [ ] Enquiries and bookings are confirmed on screen but not delivered. They are connected at launch.
- [ ] Booking availability is a sample: weekdays over the next six weeks.
- [ ] One article is published; the flagship guide and ten others say "coming soon".
- [ ] The self-check is marked "coming soon" until NeuroAIQ decides on it.
- [ ] The DRIVE™ three-week breakdown isn't shown yet; NeuroAIQ to supply it.
- [ ] Wording changes from the prototype need NeuroAIQ's approval (see the CHANGELOG).
- [ ] Trademark symbols (™, ®) aren't used consistently with the current site. NeuroAIQ to decide.

9 Getting help

Questions about the design or the build	Ahmad Zawi, Team B58 liaison · 20753581@students.latrobe.edu.au
Questions about the handover documents	Mahmoud Shuqwara · 22177153@students.latrobe.edu.au
After Team B58	NeuroAIQ's chosen web partner. Give them this guide and the System Maintenance Document.

Student addresses may close after graduation.

REMEMBER

The site has one job: turning the right visitors into conversations.

NeuroAIQ
The Neuroscience of AI Adoption
